

# 18th ISSA International Conference of Social Security Actuaries and Statisticians

16 – 18 SEPTEMBER 2015 | BUDAPEST, HUNGARY

At a time of heightened scrutiny of social security operations, the need for the expertise of actuaries has arguably never been greater. In recent years, the role of actuaries has widened to include not only actuarial valuations and an assessment of the sustainability of social security systems, but also the analysis of the adequacy of benefits, the investment options for reserve funds, the assessment of long-term care and health systems and the economic and social impacts of social security provision.

## What?

The 18th ISSA International Conference of Social Security Actuaries and Statisticians will provide an unrivalled platform to discuss and debate the key actuarial issues facing social security today.

The conference will feature contributions from all world regions, and will analyse examples of recent actuarial work addressing the challenges facing social security, as well as highlighting best actuarial practice, including the forthcoming *ISSA Guidelines on Actuarial Work for Social Security*.

## Where?

The 18th ISSA International Conference of Social Security Actuaries and Statisticians will take place in Budapest, Hungary, at the invitation of the Central Administration of the National Pension Insurance of Hungary.

## When?

From 16 to 18 September 2015.

## Who?

The conference is aimed specifically at actuaries, statisticians, economists and financial experts from ISSA member organizations, international organizations and

national and international actuarial associations, and will also be of interest to other senior social security professionals and managers. Over 100 participants from all ISSA regions are expected to attend the conference in Budapest.

## Languages

The working languages of the conference will be English, French, German and Spanish. Simultaneous interpretation will be provided.

## Programme

The conference sessions will focus on the following topics:

- An analysis of the economic and social impacts of social security.
- A focus on investment issues including the issue of long-term returns, socially responsible investment and the risks related to diverse asset choices.
- A session dedicated to best practice in actuarial work including a presentation of the forthcoming *ISSA Guidelines on Actuarial Work for Social Security*.
